

ENGINES

FUEL SYSTEM

GENERAL

System Description

The fuel system consists of:

- a multi-point fuel injection system with oxygen (O₂) sensor feedback for fuel and emission control

- four emission control systems

The emission control systems are:

- the fuel vapor recovery system
- the positive crankcase ventilation (PCV) system
- the exhaust gas recirculation (EGR) system
- the catalytic converter system

Diagnosis

The fuel injection system can be tested with Electronic Diagnostic Tester MS. 1700. The system is equipped with diagnostic connectors for this purpose.
