

SERVICE RECORD

The scheduled service intervals and specific manufacturer service and maintenance requirements for your particular Peugeot model and variant can be found by using the Peugeot service schedule calculator located at www.peugeot.com.au. Alternatively call our customer relations hotline on 1300 304 077.

It is important that your Peugeot is serviced every 12 months /15,000 km or 12 months /20,000 km (depending on model and engine variant), regardless if the distance travelled is less than the nominated kilometre interval. The time of 12 months and the nominated kilometre interval should be regarded as the maximum period between services.
