### STANDARD ADAPTERS WHICH ALLOW THE TANK TO BE FILLED WITH LPG IN ALL EUROPEAN COUNTRIES

RENAULT vehicles which operate on LPG are sold with fuel tank filler necks to suit the nozzles used by suppliers Southern Europe.

There are three different types of filler nozzles used in Europe:

- One type is used in Southern Europe, including France. This filler nozzle is called an Italian-type nozzle.
- A second type is used in Northern Europe. This nozzle is called a Dutch-type nozzle.
- A third type is used in Belgium.

In order to be able to fill up with LPG in Belgium or in Northern European countries, standard adapters are required which will fit on the filler tank necks designed for use in Southern Europe, i.e. the type fitted to Renault vehicles as standard.

These adapters are sold, for instance, at fuel stations. However, such adapters can also be ordered from certain distributors. The list below provides details of a few BRC distributors who sell the only adapter which will allow a vehicle to be filled up with LPG in Northern Europe and Belgium. The part number is **16PC 0002 0002**.

### BRC DISTRIBUTORS IN FRANCE

#### RAGUES

Z.I. 3 Caen Sud  
2, rue des Frères Lumière  
**14120 MONDEVILLE**  
Tel. 0033 2 31 72 78 00

#### I.D.S. NANTES

1, rue du Chantier de Crucy  
**44100 NANTES**  
Tel. 0033 2 40 95 95 31

### SPECIAL INFORMATION RELATING TO THE FILLER NECK ON KANGOO VEHICLES WHICH OPERATE ON LPG

The standard adapter for filler necks to allow the vehicle to be filled with LPG in Belgium is not suitable for Kangoo vehicles. The problem is that the clearance around the filler neck is not adequate to allow this standard adapter to be fitted.

As a result, in order to be able to fill up with LPG in Belgium, a special adapter is required. This is marketed by:

ADPLV  
2, rue du Moulin  
59610 FOURMIES  
Tel. 0033 3 27 60 84 00  
Fax 0033 3 27 60 84 09
